

A WORLD FIRST

Premium Private Pods for King Salman International Airport

A Design Partnership Invitation

Juriana Spierenburg
Founder & CEO, SanctumSpace

THE BUSINESS CASE

Satisfaction Drives Revenue. Private Space Drives Satisfaction.

1.5%

revenue growth
for every 1% rise in
passenger satisfaction

ACI World — ASQ Global Benchmarking

78%

of travelers demand
soundproof, private
rest pods

Future Market Insights — 2025 Survey

47%

of premium travelers
choose routes based
on amenity access

J.D. Power — Airport Lounge Benchmark 2025

THE GAP

Travelers Want Private Space. No Airport Has Delivered It.

Crowded lounges weren't designed for individual rest — yet 62% of users are there for exactly that

40%+ of global travelers face 4+ hour layovers with no flexible private option between a gate seat and a hotel

34% of connecting passengers actively seek rest pods — the demand exists, the supply doesn't

*Lounges serve
the crowd.*

*Hotels serve
the overnight.*

*No one serves
the individual.*

WHY KSIA

The World's Most Ambitious Airport Deserves the World's First Premium Pods

Hafawah Made Tangible

A private pod is Saudi generosity in physical form — personal care for each individual traveler

First-to-Market DNA

KSIA is pursuing first-to-market platforms. SanctumSpace extends that ambition to the physical experience

Built From the Ground Up

"Developing a new airport allows the freedom to introduce human-centric technology from the ground up" — Linda Schucroft, VP Innovation & CX

Destination, Not Transit

Longer dwell time = higher commercial revenue. Pods give travelers a reason to arrive early and linger

Hub Competition Edge

47% of premium travelers choose routes based on amenities. Beat Dubai, Doha, and Istanbul with a world-first

Global Headline

"Riyadh's New Airport Debuts the World's First Premium Private Traveler Pods" — ready-made press

THE EXPERIENCE

A Personal Sanctuary. Anywhere in the Terminal.

01

Book

Select a pod near your gate via the app. Choose 10 min to 4 hours.

02

Enter

Phone unlocks the pod. Door closes. The world disappears.

03

Customize

Lighting, temperature, scent, sound. Rest, Focus, or Recharge mode.

04

Leave

Session ends. Pod auto-sanitizes. Ready for the next guest.

Soundproof

Climate Control

Aromatherapy

Smart Lighting

Wireless Charging

Qibla Direction

Designed by Teague — airline interiors, Amtrak, NASA spacecraft

THE PARTNERSHIP

This Isn't Off-the-Shelf. This Is Co-Created With You.

KSIA Shapes the Product

- Pod design & materials aligned with Foster + Partners architecture
- UX flow — booking, access, in-pod, cleaning cycle
- Integration with KSIA digital ecosystem & biometrics
- Terminal placement strategy
- Cultural context — Saudi identity, Qibla, pilgrimage needs

What KSIA Gets

- First airport in the world — exclusive launch rights
- Co-branded: "SanctumSpace, designed with KSIA"
- Revenue share from Day 1 of operation
- ASQ-boosting amenity — proven satisfaction driver
- Showcase-ready for Routes World 2026 & FIFA 2034

THE MODEL

Zero Risk. New Revenue. KSIA Invests Nothing But Vision.

Design Partnership

- Co-design sprints with Teague + KSIA team
- Custom pod design for KSIA identity
- Digital integration scoping
- Prototype development to KSIA spec
- 5–10 pod pilot deployment
- 6-month full operations + data reporting

Ongoing Revenue Share

- Direct consumer: \$20–60/session via app
- Airline partnerships: Riyadh Air, SAUDIA
- Credit card perks: Amex, Visa, local banks
- Brand sponsorship opportunities
- \$2K–8K revenue per pod per month
- No lease, no infrastructure cost to KSIA

Beyond pod revenue: ACI data shows improved satisfaction drives all non-aeronautical revenue — retail, F&B, advertising. The pod revenue is the floor. The satisfaction multiplier is the ceiling.

WHO THIS SERVES

Designed for KSIA's Passengers

The Global Business Traveler

Private, productive space between connecting flights. 42% of business travelers consider private workspace essential during layovers.

The Pilgrim in Transit

Quiet, private space for rest and prayer with Qibla orientation. A deeply personal expression of Hafawah for millions of Hajj and Umrah travelers.

The Riyadh Air Connector

100+ destinations launching. 40%+ of travelers face 4+ hour layovers. Too short for a hotel, too long for a gate seat.

The Premium Leisure Traveler

150M+ tourist visits targeted by 2030. 30% of travelers opt for premium services. First and last impression matters.

PROOF & CREDIBILITY

Built by Experts. Tested by Travelers.
